

QUALITY POLICY

SAB GROUP is an innovator in the development and production of technologies based on composite materials.

Our mission is to achieve excellence in high-tech and high-performance sports, growing day by day to meet customer needs and develop new technologies by thinking outside the box.

Founded in 1994, today **SAB GROUP** is a world leader in the development and production of RC helicopters and jets under the SABHELI and SABAVIO brands. With the SABFOIL brand it has also successfully established itself in the field of water sports based on hydrofoil, such as wind-foil, wing-foil, surf-foil and kite-foil, for which it has obtained the exclusive supply for the pre-Olympic class IKA Youth Foil Class and the nomination as a sole supplier in the 2024 Paris Olympics. Currently, with the new SABROBOTIX brand, **SAB GROUP** is entering the high-tech market for freight drones.

The corporate values can be summarized in the following points:

- Customer orientation
- Awareness of the effectiveness and efficiency in process management
- Loyalty, integration and development of the skills of our collaborators
- Enhancement of people in terms of professional growth
- Commitment to scrupulous compliance with the relevant legislative provisions/agreements, when applicable

Therefore, all that being said, the Management of **SAB GROUP** is committed to achieving the following objectives:

- improvement and optimization of processes by eliminating inefficiencies
- digitalization of processes to increase efficiency
- growth and consolidation in the market
- develop innovative products that are increasingly attentive to customer needs
- growth of internal resources of the company

The quality policy is shared with the entire organization and with all **SAB GROUP** customers and suppliers through publication on the website *www.sabgroup.it*.

The quality policy is checked annually during the review by the Management and every time there are changes or events such as to allow for improvement.
